Start the season with

Clean Fields

Autumn™ Super herbicide provides burndown of emerged weeds to start the season with clean fields.

**BURNDOWN OF EMERGED WEEDS**

Autumn Super provides burndown of emerged weeds keeping the weed seed bank in check. A clean seedbed means quicker crop emergence in warmer soils.

**RESIDUAL CONTROL**

Autumn Super stays active in the soil before the growing season, offering residual control. Clean fields are less likely to attract black cutworm moth, and they won’t support nematodes and grubs.

**RESISTANCE MANAGEMENT**

Corn and soybean growers can look to Autumn Super to control resistant weeds. Autumn Super tankmixed with Roundup® provides two sites of action for burndown of glyphosate-resistant weeds and protects against further resistance development.

---

**Key Pests Controlled**

- Alfalfa
- Barley, Little
- Bluegrass, Annual
- Brome, Downy
- Burcucumber
- Burdock
- Buttercup
- Canola, Volunteer
- Carrot, Wild
- Chamomile, Scentless
- Chickweed, Common
- Chickweed, Mouseear
- Dandelion, Common
- Deadnettle, Purple
- Foxtail, Carolina
- Garlic, Wild
- Groundsel, Cressleaf
- Hemlock, Poison
- Hempnettle
- Henbit
- Horsernettle
- Marestail
- Mustard, Blue
- Mustard, Tansy
- Mustard, Wild
- Pansy, Field
- Pennycress, Field
- Pigweed, Redroot
- Plantain, Broadleaf
- Pokeweed, Common
- Radish, Wild
- Ryegrass, Italian
- Shepherdspurse
- Thistle, Canada
- Turnip Weed
