

THE POWER TO PROTECT

INTRODUCING

CHANNEL[®] PROTEXUS[™] corn, bred to provide disease tolerance and backed by the customized service and expert knowledge you count on from your Channel Seedsman. With enhanced protection against anthracnose stalk rot, gray leaf spot, Goss's wilt and leaf blight, northern corn leaf blight, and southern rust of corn, Channel Protevus products help you manage risk and grow a healthy corn crop. They're also treated with Acceleron[®] Seed Applied Solutions ELITE with Enhanced Disease Control, which reduces infections caused by *Fusarium*, *Rhizoctonia* and *Colletotrichum* (the pathogen that leads to anthracnose stalk rot).

ANTHRACNOSE STALK ROT

GRAY LEAF SPOT

GOSS'S WILT AND LEAF BLIGHT

NORTHERN CORN LEAF BLIGHT

SOUTHERN RUST OF CORN

ADVANCED BREEDING. ADVANCED PROTECTION.

Channel Protevus products undergo a rigorous selection process using field-proven, precision-breeding technology to help you maximize plant health and yield potential. From the lab to the field, Channel Protevus products are tested under a wide range of growing conditions, so you can be confident that you have the best possible genetics for your local growing area. The result is a portfolio of elite seed products that combine Channel brand performance with **enhanced protection against the five most devastating, yield-robbing corn diseases.**

CHANNEL PROTEXUS PRODUCTS ARE SELECTED FOR:

- Channel brand yield performance and agronomics
- Strong emergence and early-season vigor
- Improved disease tolerance to:
 - Anthracnose stalk rot
 - Gray leaf spot
 - Goss's wilt and leaf blight
 - Northern corn leaf blight
 - Southern rust

BACKED BY SERVICE AND EXPERTISE FROM YOUR CHANNEL SEEDSMAN

Healthy plants start with the right genetics. Your Seedsman works with you to select products based on field conditions and local performance data to help you place the right products for the best performance. It's all about identifying your needs and finding the right disease package to help you maximize plant health.

BRED TO PROTECT. PLACED TO PERFORM.

PROTECT YOUR PLANTS with the flexible portfolio that offers tolerance to five major disease threats:
